About Me

A results-driven SEO specialist and BS Artificial Intelligence student (6th semester, CUST Islamabad) with ~3.5 years of hands-on experience across On-Page, Off-Page, and Technical SEO, CTR campaign management, and bio-entity stack building. Combines technical AI/CS training with practical, revenue-focused SEO execution — comfortable working across GA4, GSC, SEMrush, Ahrefs, Screaming Frog, Moz, and Surfer SEO. Seeking to contribute immediately in a role that blends analytical SEO strategy with technical depth.

Education

Matriculation Cadet College Fateh Jang- Islamabad Duration: 2019–2021	ICS Punjab Collage D9- Campus	BS AI 5th semester Capital University of Sci.. & Technology Islamabad Duration: 2024–Onward
--	---	---

Experience

2021 - present

- **SEO Specialist — Web20 Ranker | Remote] | 3.5 years]**
- Remote · MultipleInternationalClients
 - Managed end-to-end SEO campaigns — On-Page, Off-Page, and Technical SEO — for client websites, including keyword optimization, meta tag structuring, and site audits.
 - Executed CTR-focused campaigns to improve click-through rates and search visibility.
 - Built and maintained bio-entity stacks (GBP setup, JSON-LD schema, NAP citations, co-citation strategies) to strengthen local and topical entity signals.
 - Used GA4, GSC, SEMrush, Ahrefs, Screaming Frog, and Moz for performance tracking and technical audits.

Key Projects

- AIBasedProjects**
- Social Network Analyzer (Vanilla JavaScript, HTML/CSS)**
- Built an interactive, browser-based social network analysis tool — fully client-side, no backend.
 - Implemented BFS for shortest-path/connectivity queries, degree/betweenness centrality for influence ranking, and community detection to cluster related nodes.
 - Delivered a working demo plus a full technical report with complexity analysis.
- Rule-Based Social Engineering Detector (Python)**
- Built detector.py, a lightweight script flagging phishing and pretexting attempts via keyword and pattern matching.
 - Deliberately avoided ML dependencies for a zero-setup, instantly runnable tool.
- EduTrack — Student Task & Attendance Manager (Node.js, Express, TypeScript)**
- Co-built a full-stack web app for student task and attendance management.
 - Owned requirements engineering and system design documentation (UML diagrams, SDLC planning) alongside backend development.
- CUDA GPU Parallel Computing Labs (CUDA C, Google Colab)**
- Implemented multiple parallel algorithms, comparing GPU kernel performance against sequential CPU baselines.

Achievements & Activities

Freelance SEO Professional (3.5+ Years)
Managed SEO campaigns for international clients while pursuing a full-time AI degree, balancing academic workload with real client .deliverables and deadlines

Technical SEO Audits — Conducted comprehensive technical audits using Screaming Frog, GSC, and SEMrush, identifying and resolving [crawl errors, indexing issues, site speed problems — pick what applies] for client sites.

Cross-Domain Application — Applied AI/ML coursework (data pattern analysis, automation logic) to SEO reporting and audit workflows, bridging technical and marketing disciplines.
